DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Nelson (U.S. Patent 3,696,878). Nelson discloses a compactor having two spaced modular units (10, 11). The units have a power source and steering adjustment. Both units have a compaction belt (57).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson as applied above, and further in view of Moorhead (U.S. Patent 3,832,079). Nelson does not teach the drum configuration as claimed. Moorhead teaches a large drum (16) and two smaller drums (36, 42) used with a belt compactor. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the configuration as claimed in order to better suit a particular application, in accordance with the teaching of Moorhead.
5. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson as applied above, and further in view of Abd. El Halim (U.S. Patent 4,737,050). Nelson does not teach

Art Unit: 3671

compacting asphalt. Abd. El Halim teaches using a belt compactor for use with asphalt. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the apparatus of Nelson for compacting an asphalt mat in order to obtain a smooth, even surface, as taught by Abd. El Halim.

Allowable Subject Matter

6. Claims 1-13 and 16-18 are allowed.

Response to Arguments

7. Applicant's arguments filed 10/21/2002 have been fully considered, and are persuasive regarding the method claims, but they are moot in view of the new grounds of rejection for the apparatus claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 703-308-3870.
